

Project Flow

Step 1: Data Collection & Extraction

→ Obtained the UNESCO Heritage dataset (whc-sites-2019.csv) from SmartBridge.

Step 2: Data Preparation

→ Cleaned dataset, checked null values, selected required columns (Region, Name, Area, Latitude, Longitude).

Step 3: Data Visualization

→ Built worksheets in Tableau for:

- Bubble map by region
- Top 10 regions by area
- Danger sites overview

Step 4: Dashboard

→ Combined multiple worksheets into dashboards:

- Interactive filtering
- Highlight actions

Step 5: Story

→ Created a storyboard in Tableau linking dashboards with navigation.

Step 6: Performance Testing

→ Tested the dashboards for interactivity and responsiveness.

Step 7: Web Integration

→ Embedded dashboards and story in a Flask app with a Bootstrap UI.
